GR1

Attributes: IDEA - Global Understanding and Engagement, IDEA - Power, Difference, and Inequality, IDEA - FY - First Year Seminar

TITLE: Afro-Latina/os in the U.S.

IDEAS IN ACTION GEN EDS: FC-GLOBAL, FC-POWER

COURSE DESCRIPTION
What does it mean to be both racially Black and ethnically Latino in the U.S.? This course will look at the history, culture, experiences, political struggles, and social dilemmas of ¿Afro-Latinos¿: African-descended peoples from Latin America and the Spanish-speaking Caribbean who reside in the U.S. The erasure of these communities, along with their struggles for well-being, prosperity, belonging, and visibility, will be explored. This course provides an opportunity for a deeper understanding of the legacies of the transatlantic slave trade, ethno-nationalism, and U.S. foreign-policy, and their connection to contemporary issues of migration, inequality, and anti-blackness. In-depth conversations about the politics of ¿race¿ and ¿ethnicity¿ will trouble dominant

Attributes: IDEA - Engagement with the Human Past, IDEA - Power, Difference, and Inequality, IDEA - FY - First Year Seminar

TITLE: Gender, Marriage, and Family in African American History

IDEAS IN ACTION GEN EDS: FC-PAST, FC-POWER

COURSE DESCRIPTION
What can the study of the Black family in U.S. history and culture tell us about the past and about our present? This seminar examines the history of marriage and family from slavery to freedom. It is designed with the idea that there is no one singular representative experience, but rather a multitude of voices and perspectives that comprise this history. Readings will consider the historical processes and constraints shaping Black family life in the U.S. alongside themes of resistance, adaptability, and resilience. Over the course of the semester, we will explore historians¿ responses to contemporary narratives about the pathology of the Black family after the Civil War.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

TITLE: Asian Americans in the US South

IDEAS IN ACTION GEN EDS: FC-POWER

DESCRIPTION
In this seminar, we will study the history, cultures, and documentation of Asian Americans in the U.S. South, from the 19th century to present. Drawing on a range of sources, from oral histories and poetry to documentary film and short stories, we will examine how Asian Americans have grappled with identity, belonging and home in the South. In our studies together, we will consider how Asian Americans have navigated national and regional histories of slavery and segregation, immigration exclusion, and the shifting borderlands of the American South and the Global South. With a focus towards working with community and institutional archives, we will explore how to research, discuss, write, and create with the stories of Asian Americans throughout the region, and across

This course traces the development of Cherokee philosophy and thought, beginning with an exploration of the Southeastern Ceremonial Complex and its stories. From the time of European contact, we progress through modern literary texts and lectures about how Cherokee people have conceived of the world. We will explore the bases of Cherokee thought and apply that understanding to analyzing texts by Cherokee authors. Students will gain a deeper understanding of Cherokee culture and society by exploring the stories and beliefs that have been important over time.

TITLE: A History of the World in 12 Objects

IDEAS IN ACTION GEN EDS: FC-PAST, FC-KNOWING

DESCRIPTION
How did we get here? What were the major transformations in human history that created our world? What impacts have these changes made on the natural world and on us? What can we learn from this long history? This class is about objects and social change: meaning that we will use human-made objects ¿ artifacts ¿ as a way to understand the long and complex history of our species. We use the concept of `object biography¿ to do this ¿ you will each get a chance to produce an object biography of your own and to think critically about how we understand and represent material culture in museum displays.

TITLE: Taking up Space: Colonization, Resources, and Life Beyond Earth

IDEAS IN ACTION GEN EDS: FC-KNOWING

DESCRIPTION
Our early human ancestors were great travelers moving across great distances over many generations and thousands of years. Our more recent human history is dominated by human colonization as new waves of people traversing the globe using technological innovations and paving a path of incomparable destruction and exploitation that continue to overshadow the lives of millions of people and our very planetary health to this day. In early 2020 Elon Musk, CEO of SpaceX released their campaign to ¿Occupy Mars¿ by 2050, joining a long linage of human ventures that have considered places and peoples unknown to them up for grabs and consequently, ownership and exploitation. Fantastic research, technology, international cooperation, and human advancements have come out of

This course explores the origins, development, and consequences of capitalism over the last five hundred years from an archaeological perspective. What this means is that we will use the relationships between peoples and material objects to understand this thing we now call ¿capitalism.¿ Some examples include the global spread of mass-produced table ceramics for dining practices, the interaction between house styles and early colonial ideologies of race, or the ways in which childhood toys reflect the ideas about the structure of family. We will also focus on the spaces of early capitalism: the frontier trading post, the plantation, the factory, the company mining town. Lastly, we will examine how these early places of globalization persist in contemporary memories, the ¿negative heritage¿ of Atlantic docks, dispossessed tenant farms, or mining ghost towns.
Case studies will be global in scope and will mostly focus on mutual development of capitalist economies and colonial states across the world. This course will be discussion oriented, and assessment will be via in-class engagement, short-writing assignments, and a final project.

The Anthropology of Human Violence: Past, Present, and Future
In this seminar, we will examine fundamental questions concerning the nature of human violence (homicide, genocide, and warfare). Questions include what is the evolutionary origins of human violence? Are we inherently violent? What was the nature of warfare before the development of modern nation states? Was warfare more frequent and more deadly in the prehistoric era than the modern era? How might human conflicts change in the future?

Concern over the relationship between population and environment abounds, but the most salient research and discussion in environmental studies has focused on one aspect of the relationship --human impact on the environment. In this seminar, we will be concerned with the other side of the relationship as well -- how environmental characteristics (certainly the physical and biotic environments, but also the social/economic/political environments as they interact with the above) affect population characteristics and dynamics. These two "directional arrows" (population ¿ environment, and environment ¿ population) are of course ultimately inseparable. We will examine not only how environmental characteristics affect human population dynamics (reproduction, family formation, movement, survival), but also with how responses to those environmental characteristics -- through mitigation or coping -- in turn affect the environment (biodiversity, land use and degradation, changes in infectious diseases, and more). That is, we will whenever possible take a systems view. A special emphasis will be on the biological and behavioral consequences of environmental fluctuations and unpredictability.

TITLE: Tree, Timber, Totem
IDEAS IN ACTION GEN EDS: FC-CREATE

DESCRIPTION
Trees, through their biology, meaning and uses, create an arc of understanding that spans what it means to be human. Ultimately, we will explore the meaning of trees and wood and why we seek happiness in nature, cherish wood and the creation of objects of wood. Tree: What is a tree from a biological perspective? How do they represent a complex community and play a vital role in life on the planet? Timber: What is the economy of wood internationally and in the state of NC? What are biophysical and material properties of trees that allow them to grow so large and be so useful to human society? Totem: Why do we respond emotionally to wood and choose it as a material in our lives and surroundings? How do we design and create objects of meaning from wood? We will walk in the woods, meet ¿wood people¿ from across the state and country and learn woodworking with projects of the students¿ design and creation.

TITLE: Convergent Research: Solving the Grand Engineering Challenges of the Future

DESCRIPTION
Convergence research focuses on addressing complex problems in science, engineering, and society. Today's and tomorrow's grand challenges will not be solved by one discipline, but by the integration of knowledge, methods, and expertise from across various disciplines.

This first-year seminar will introduce students to the new scientific language of convergence research. Through surveying the grand challenges of engineering, we will learn how through pursuing a common research challenge, experts from various fields intermix their knowledge, theories, methods, data, and research communities, enabling new discoveries to emerge. Students will participate in various in-class activities, group discussion and problem-solving coaching to enhance understanding of how chemistry, physics, materials science, biology, math, and computer sciences are applied to engineering.

Engineers help to design and build solutions to the world's problems. This course will explore some of the fundamental skills and tools in engineering. You will get experience using engineering tools, and you will also develop a mindset so that you can "learn how to learn" because technology changes rapidly and the tools that you use today may be obsolete in 20 years. There will be an emphasis on developing strong professional skills, including work in a group setting and effectively communicating your efforts.

In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture. For example, while it may be easy to develop an engineering solution to a problem, what are the economic and ethical considerations of various solutions? These concepts are important to help engineers build a better world.

This will be an "active learning" class in which we spend much of our class time working. For example, we will write computer programs to model and simulate

Design thinking is a popular buzz term in this age of Kickstarter, instant turnaround, and short time-to-market. But what is design thinking really all about? In many ways, it is a process that most of us were quite familiar with in our preschool years. Observe an opportunity. Take an action. Assess the results. Laugh at the failures. Repeat. Design is not just for artists and engineers - we are all designers!

But how do we get back to that pure form of design thought? In this class we will explore design through active making, discussion, presentation, and self-evaluation. Starting with the most basic of materials, we will exercise our latent creativity muscles and exorcise the constrained thinking and other obstacles engrained in us by "traditional" education. In this class, "failure" is an important concept that will be embraced and even celebrated. Science, entrepreneurship, and life itself is a process of try and try again. We must accept and learn from failure in order for "try" to become "do" and for "do" to lead to success.

How can you measure temperature, pH, heart rate, movement, distance or anything else in the physical world? First, you need a sensor! In this class, we will learn how to analyze, design, and build systems for the entire sensor to measurement process. We will use a variety of sensors that measure physical and environmental parameters. We will model these sensors and understand how they work and interact with electrical circuits. We will learn the basics of circuit design and analysis so that we can amplify and ¿clean up¿ the signals with filters. Finally, we will learn how to acquire these signals to a computer through data acquisition hardware and LabView software.

Requisites: ONE of the following ¿ PHYS 105, 115, 117, or 119.

Do you have an entrepreneurial idea and you would like to make a prototype to turn your idea into reality? Or do you want to experience the design and making process? In this class, you will go through this process for a semester-long project. The final outcome will be a prototype that meets an entrepreneurial need.

The pre-requisite is APPL110 or permission from the instructor for those who have significant experience in the BeAM Makerspace of something equivalent. Orientation in the BeAM Makerspace is required. Students from any major are welcome to take this class.

You do not need to have an entrepreneurial idea before taking this class. You will work in groups to identify entrepreneurial ideas, which could emerge from discussions with people in the UNC community, local community, or around the country. From these ideas, you will choose a topic for your semester project, and then start working with your group on different designs, getting feedback throughout the process. By the end of the semester, you will fabricate a

An ideal research experience provides students with practical experience in a research lab, performing work that is relevant to their UNC education. The research internship should develop and enhance the students¿ professional skill sets and involve experiences that allow students to have responsibility for results that are of value to the research laboratory.

Research interns are mentored by a faculty member and other members of their lab. The implementation, and evaluation of the internship are a collaborative effort between the student and their research mentor. If the research mentor is not a member of the APS faculty, then the students should also have an APS faculty advisor. Oversight is also provided by the APS Research and Internship Coordinator and/or Director of Undergraduate Studies (the same person may be

serving both of these roles). Internships are typically 150 hours in duration (10 hours per week during an academic semester). However, internship time frames can be flexible to match the needs and interest of the student with the opportunities offered by the research lab.

ARTH 054H.001 | Art, War, and Revolution
TR, 12:30 pm - 1:45 pm. Instructor(s): Daniel Sherman. Enrollment = 20.
This course explores the complex relationship between art, war, and conflict. We will consider the tensions between glorifying war and violence and memorializing their victims, between political justification and moral outrage, between political programs (many of the works being commissioned to legitimate a particular view of war) and the malleability of meaning. In most weeks, we focus on a single or small groups of works, mostly from Europe and the U.S., in a variety of media: painting, sculpture, architecture, photography, and graphic arts, taking the opportunity to study them in depth while also gaining exposure to a range of interpretive methods and the richness of the historical context. We also look at the ways works of art themselves become the trophies or stakes of conflict.

FIRST YEAR STUDENTS ONLY.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Topic: Technology, Art, Politics

This seminar-style course will critically examine the relationships between technology and art in modern culture, with particular emphasis on the implicit and explicit politics of such relationships. We will explore histories of art, aesthetics, scientific thinking, and mechanical production as ongoing struggles over notions of social progress and emancipation, alienation and domination. We will think through the realities and myths of technological devices as tools by which people extend themselves out into the world, connecting, (re)producing, and engaging with sensual, intellectual, and material apparatuses. This course will focus on the aesthetic politics of technology¿the possibilities and limits of critically engaging in the making and distribution of images and objects, information and knowledge, and the challenges posed by and to artistic production.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

ARTS 105H.001 | Basic Photography
TR, 11:00 am - 1:45pm. Instructor(s): Joy Drury Cox. Enrollment = 15.
In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of

image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium¿s rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

Drawing in Virtual Reality.
This course is an exploration of digital processes in drawing with an emphasis in Virtual Reality. The class gives students the opportunity to create immersive creations with the Oculus Quest 2 headsets. Students learn to use foundational drawing techniques using the VR platform and explore the artistic and critical potential of VR and other digital processes. Class sessions will consist of technical workshops and ¿hands-on¿ projects developing Virtual Reality environments as well as class discussions and critiques of student work. Students will also research artists who utilize drawing as a medium through new technologies, as well as the history + cultural topics that influence the direction of traditional mediums. While no prior experience in VR technologies is required, this is a research course, with a certain level of independent work and exploration beyond the introductory workshops presented in the class. Main applications utilized: Multibrush VR, Gravity Sketch, Adobe Illustrator and Adobe Fresco. A laptop is required. However, drawing tablets and Oculus headsets are provided for use in the classroom.

ARTS 390 Sculpture Garden: Holograms, Prototypes and Dioramas.
Navigating the terrain between history, landscape and social justice, students will produce a large-scale installation that will feature an app based, guided walking tour, a scale model/diorama of UNC campus and several Pepper¿s Ghosts holograms. Students will also work with several computer programs (Google Earth, Equator, etc) and Sculpture making tools (Shopbot and Laser Cutter) to generate 3D models of the surrounding landscape, forming the anchor point for the installation. This class will culminate with a public presentation of the faculty-led work as part of the Alumni Sculpture Garden program.

Art As Social Action.
Art has long since played a pivotal role in social and political sphere, challenging social norms, practicing the concept of living as art form, and engaging with communities and the complex issues they face. Today, more than ever, artists and activists ¿ often interchangeable and occupying the same role ¿ are working powerfully together to instigate positive change in this moment of incredible political unrest. This is an experiential learning course that will take collaboration and dialogue as central to the work that we do as artists, blurring the distinction between life and art. By examining the work of artists ranging from radical collectives to conceptualists, we will experiment, create, and engage in our own course-long project both individually and collectively as a class.

Seminar

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

Understanding and Engagement, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

BIOL	89	001	12937	FYS: SPECIAL TOPICS	Lecture (In Person On Campus Learners)	3	A

TITLE: Biodiversity and Citizen Science
IDEAS IN ACTION GEN EDS: FC-QUANT, FC-NATSCI

DESCRIPTION
Citizen science is the collection and analysis of data relating to the natural world by the general public. With the power of smart phones, anyone can now contribute meaningful observations that help scientists understand the distribution of biodiversity and the impacts of global change. In this seminar we will explore the promise and pitfalls of citizen science, while contributing our own observations of the biodiversity around us.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only

Attributes: CI- Communication Intensive, E6- Mentored Research, IDEA - Empirical Investigation Lab

This research-based lab introduces students to the process of science through collaboration on a research project, learning relevant techniques and scientific skills.
Topics include identification of soil bacteria and isolation of natural products they produce.
This lab can be taken in place of BIOL 101L and when taken with BIOL 101, counts as Communication Intensive credit. Counts as EE.

First Year Students ONLY.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

BIOL 202H.001 | Molecular Biology and Genetics
TR, 9:30 am - 10:45 am. Instructor(s): Joe Kieber. Enrollment = 24.
The content of this course will be similar to that of a regular section of BIOL202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, genome organization, biotechnology and genetic engineering. There will be two class meetings per week with special emphasis on class discussion and an interactive classroom. You are expected to be actively engaged in this course through discussions, class activities and pre- as well as post-class assignments and readings. In addition to three mid-term exams and the final exam, there will be one significant writing/media assignment and at least one small group project during the semester. The required text for this course will be Essentials of Genetics (10th edition) by Klug et al. There will be additional assigned reading from various sources Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course.

BIOL 205H.001 | Cellular and Developmental Biology
TR, 11:00 am - 12:15 pm. Instructor(s): Bob Goldstein / Celia Shiau. Enrollment = 24.
BIOL 205H Cellular and Developmental Biology is an Honors course that covers the fundamentals of cell structure and activity in relation to special functions, metabolism, reproduction, embryogenesis, and post-embryonic development, with an introduction to the experimental analysis of cell physiology and development. The material that we present will mirror what is presented in non-honors sections, plus we will use some class periods for hands-on enrichment activities and discussions. These activities are designed to give you experiences related to the course topics, and to give you time to interact informally with the instructors and with each other.

PREREQUISITE: GRADE OF C- OR BETTER IN BIOL 202.

BIOL 220H.001 | Molecular Genetics
TR, 9:30 am - 10:45 am. Instructor(s): Kerry Bloom. Enrollment = 24.
To provide you with the core principles of genetics and molecular biology.
The lecture/discussion sessions and the book will provide the basic content. We will take an historical approach at times to discuss seminal experiments and how they were done. We will examine the basic ¿rules¿ of genetics and molecular biology. After this class you will be prepared to do research in a lab on campus and to build upon this content with upper-level genetics courses and/or molecular biology courses.
Skills --
· Build hypotheses to answer a specific scientific question, design an experiment
using an appropriate technique/assay to answer the question, predict and analyze the results of the experiment
· Give examples of how advances in genetics and molecular biology, from the discovery of DNA¿s structure to the sequencing of individual genomes, have

BIOL 224H.001 | The Mathematics of Life
TR, 9:30 am - 10:45 am. Instructor(s): Maria Servedio / Todd Vision. Enrollment = 24.
This course is aimed at Honors Biology majors in their sophomore or junior year. It enriches the foundational material from BIOL 201, 202 and 205 by studying classic applications of math to many of the same topics. By revealing the mathematical underpinnings of much of the material in the majors¿ core, this course will introduce students to quantitative approaches and research directions across Biology.

One of the goals of this section is to make a mathematical approach to these topics as accessible as possible. To accomplish this, we will use a number of techniques to remove some of the anxiety that many students experience when dealing with mathematical problems. These include making the material accessible by approaching the mathematical formulations from intuitive biological principles, eliminating time constraints in problem solving as much as possible, working in groups, and encouraging lots of questions. No advanced mathematical knowledge beyond the first semester of calculus is required. The mathematical

Attributes: PL- Physical and Life Science
Class Equivalents: BIOL 290/290H

Cellular Agriculture refers to the cultivation and manipulation of animal cells to create true animal products (food, leather, etc) without the need to raise and slaughter animals. Join UNC¿s first cellular agriculture focused course to learn the foundational biological and chemical processes used to produce cultivated meat. Lectures will cover state-of-the-art techniques for cultivated meat production and will allow you to think critically about the future of food.

BIOL 395 001 2376 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	395H	001	2381	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward fulfillment of major requirements; six credit hours may be counted as one lecture course with laboratory toward fulfillment of major requirements.
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

BIOL 436H.001 | Plant Genetics, Development, and Biotechnology
TR, 11:00 am - 12:15 pm. Instructor(s): Jason Reed. Enrollment = 35.
Recent advances in plant molecular biology, genetics, development, and biotechnology, and their potential relevance to agriculture. The course will include lectures, reading and discussions of papers from the primary literature, and student presentations.
Prerequisites: Biology 271 or Biology 202 or permission of the instructor.

The course will focus on several themes that will illustrate methodological approaches and intellectual questions in plant biology. These themes may differ in different years. Each theme will be covered over several class periods (2-3 weeks). We will intersperse lectures and more focused class discussions centered on papers from the primary scientific literature reporting research findings. Students will:
i) learn about current methodologies and questions of scientific interest in plant molecular biology;

Course Goals: A major goal is to acquaint you with evidence of the past (deep) history of life and the interaction of life, earth processes, and climate, using selected events from the 3.5 billion year existence of life on Earth, as evidenced by fossils in combination with other approaches, such as isotopic geochemistry, genomics, development, etc. Part of the focus will be on how does one interpret the fossil record, and what other lines of evidence aid in that. Over 90% of all species that ever lived are extinct and while fossils represent only a small percentage of all past life, they provide many useful insights.

BIOL 495 001 4217 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	495	039	4562	UNDERGRAD BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

We are currently amid a revolution in biology and medicine that centers on the ability to alter and probe transcriptomes and genomes at will using new molecular genome editing techniques. This revolution has spread across all model systems and has even begun to change the definition of what a model system is. In addition, these technologies are changing the way we treat disease, alter agriculturally important species, influence populations of organisms in our environment, and even ourselves. The goal of this course is to familiarize students with genome editing technology and look at recent advances and applications for genome editing. This course is intended for graduate students and advanced undergraduates. The course will cover primary literature and evaluate the scientific data in these publications. As such, a strong background in molecular biology and genetics is highly recommended, as is good standing in BIO202.

TITLE: Polymers: How Plastic Changed Our World

DESCRIPTION
From milk bottles and grocery bags to contact lenses and diapers, polymers influence nearly every aspect of our daily lives. Through hands-on activities, readings, and interactive lessons, we will examine the role polymers have played, both positive and negative, on our society and world. The course will start with a general chemistry background in chemical structure. Then we will examine the impact of common plastics before exploring how polymers have influenced specific fields, including parts fabrication (e.g. 3D printing), dentistry, and electronics. During the course, students will have the opportunity to create their own biodegradable plastic as well as practice science communication through two separate projects: creating a stop-motion animation video and a 30-min group presentation.

CHEM 101H.001 | General Descriptive Chemistry I
MWF, 9:05 am - 9:55 am. Instructor(s): TBA . Enrollment = 30.
Chemistry 101 is the first half of a yearlong overview of the exciting field of chemistry, the study of the properties and changes of matter and energy. Students will be exposed to many new concepts, techniques and phenomena including atomic and molecular structure, stoichiometry, conservation of mass and energy and thermochemical changes. Chemistry 101 is a pre-requisite for Chemistry 102, and together, Chemistry 101 and 102 are the gateway to all courses in chemistry

GR1

Attributes: PX- Physical and Life Science with Lab, IDEA - Natural Scientific Investigation
Class Equivalents: CHEM 102/102H

CHEM 102H is recommended by the Chemistry Department for STEM majors who have excelled in their pre-college chemistry classwork and who have an interest in pursuing chemistry or another STEM field as an academic major at UNC. The topics covered have been identified by the Department of Chemistry faculty as essential for success in and a good foundation for more advanced study in chemistry and other areas of the basic and applied sciences. The textbook, lectures and course work require a willingness to accept rigorous academic challenges and a solid high school background in algebra, coordinate geometry,

and trigonometry. Differential and integral calculus will be used only where necessary in derivations and with explanation.

STUDENTS ELIGIBLE FOR ENROLLMENT IN CHEM 102H: ¿Students who performed highly in their CHEM 101 at UNC-CH may email Dr. Tiani (tiani@email.unc.edu) to be considered for enrollment in CHEM 102H. Students who have earned AP, IB or TR credit in CHEM 101 may also email Dr. Tiani (tiani@email.unc.edu) to be considered for CHEM 102H. Because the instructor evaluates students for admission into CHEM 102H, and because the class size is capped at 40, it is recommended that students enroll in a normal CHEM 102 section until they hear from the CHEM 102H instructor regarding their status to be enrolled in CHEM

CHEM 241H.001 | Modern Analytical Methods for Separation and Characterization
TR, 12:30 pm - 1:45 pm. Instructor(s): Matthew Lockett. Enrollment = 20.
Analytical separations, chromatographic methods, spectrophotometry, acid-base equilibria and titrations, bioanalysis, immunoassays.

Qualitative and quantitative chemical measurements are essential to understand the chemical and physical changes happening around us. This course will focus on the fundamental of modern analytical methods as applied to medical diagnostics and point-of-use immunoassays. In particular, we will discuss the importance of (1) sample preparation, analytical separations, and chromatography prior to analyses, (2) the use of spectrophotometry and electrochemistry to quantify the component interest in a mixture, and (3) the experimental design considerations to determine the ability to quantify that component of interest correctly.

CHEM 261H.001 | Honors Organic Chemistry I
TR, 2:00 pm - 3:15 pm. Instructor(s): Todd Austell. Enrollment = 20.
Molecular structure of organic compounds, and the correlation between structure and reactivity including the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion, problem-solving, and the investigation of organic chemistry research at UNC.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.
PERMISSION OF INSTRUCTOR REQUIRED. EMAIL chemus@unc.edu.

NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

CHEM 262H.001 | Honors Organic Chemistry II
MWF, 9:05 am - 9:55 am. Instructor(s): Michael Crimmins. Enrollment = 30.

Continuation of CHEM 261H with particular emphasis on the chemical properties of organic molecules. This course will be similar to CHEM 262, but with a greater emphasis on class discussion and on discussion of contemporary research problems.

PREREQUISITE: CHEM 261 OR 261H.
INSTRUCTOR CONSENT REQUIRED.

Michael Crimmins received his B.A. degree from Hendrix College and his Ph.D. from Duke University. His research interests are in the development of new synthetic methods and their application to the total synthesis of biologically active compounds. He has served as Chair of the Department of Chemistry and

CHEM 430H.001 | Introduction to Biological Chemistry
TR, 11:00 am - 12:15 pm. Instructor(s): Brian Hogan. Enrollment = 30.
Dynamic examination of the principles of biochemistry, from macromolecules through enzyme function and catalysis, and into the primary metabolic pathways that generate cellular energy. This course will be an interactive combination of lecture, group based guided inquiry along with presentations from students and deeper dives into topics of mutual interest to course participants. The goal of the course is to provide a detailed foundation in biochemistry and to teach critical thinking skills focused on understanding and challenging primary biochemical data. Students who enroll in this course are typically heading to graduate or professional school in this area of study, or will use the principles employed to enhance their problem-solving abilities.
Chemistry 430H is designed for chemistry majors and is not cross-listed with biol 430. Hence, Chemistry majors in the honors program will have priority.
Seats will open as follows: Chemistry majors in honors with senior status,
Chemistry majors in honors with junior status, Chemistry majors BS-Biochem, Chemistry majors BA. Any additional seats (and there usually are very limited

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

CLAS 133H.001 | Epic & Tragedy
MWF , 10:00 am - 11:45 am. Instructor(s): Suzanne Lye. Enrollment = 24.
Anger, grief, love, war, fear, pride, and desire ¿ these are but some of the emotions that heroes experience in their quests for glory and immortality as they face the challenges of their destinies. In this course, we discuss the story of the hero as conceived by the ancient Greeks and Romans in famous works of epic and tragedy. By reading about both male and female heroes from the ancient world, we address questions of what it means to be "human¿ and discuss how ancient concepts of the heroic and anti-heroic inform our understanding of the human condition. This course introduces (or re-introduces) students to the great epics and tragedies of ancient Greece and Rome, focusing on the exceptional individuals whose stories defined those cultures ¿ and our own. We start with Homer¿s Iliad and Odyssey. We then follow the stories of epic heroes as they are transformed and interpreted by different authors across different genres and through time, particularly in the tragedies of Aeschylus, Sophocles, and Euripides but also in the later Roman context with Vergil¿s Aeneid and Ovid¿s Metamorphoses. In addition to reading translations of these ancient texts, we will look at heroic representation in related

CLAS 240H.001 | Women in Greek Art and Literature
TR, 3:30 pm - 4:45 pm; Recitation: W, 3:35 pm - 4:25 pm. Instructor(s): Sharon James. Enrollment = 14.
In this class, we will learn about the life of women in ancient Greece, beginning with this question: what do we mean when we say ¿women in ancient Greece¿? Since Greek cultural values and class structures make the category ¿woman¿ very complex, it will take us all semester to answer this question. We will focus on the treatment, both legal and social, of women in antiquity, by examining the visual depictions of women and women¿s lives as well as the literary evidence. We will also look at the gap between ideology and reality, asking "did Greek men really hate women?" We will cover about 900 years of history in this course.

Throughout the term we will study theories, laws, and social practices applying to women, looking particularly at: concepts of woman; differing gender ideologies for women in the different regions of Greece (Sparta, Gortyn, Athens) and in different social classes; occupations for women; the involvement of

CLAS 263H.001 | Athletics in the Greek and Roman World
MWF, 10:10 am - 11:00 am; Recitation: W, 12:20 pm - 1:10 pm. Instructor(s): Alexander Duncan. Enrollment = 24.
To talk about sport is to talk about society, both today and in antiquity. This course will inspect the cultures of ancient Greece and Rome, from the age of Homer to the end of the (Western) Roman Empire, through the lens of athletics. We will scrutinize the mechanics and logistics of ancient athletic events and take up larger questions of interpretation, considering sport within its religious, cultural, and political contexts. Adopting and adapting an extensive battery of theoretical approaches¿economic, anthropological, poetic, political, sociological, etc.¿we will address such questions as the following: How do the ideals embodied in Greek and Roman sport relate to the myths and cultural practices of these societies? How were competitors, whether amateur or professional, rewarded and regarded by their societies? What ethical dilemmas did athletes face? Why were animals, slaves, and religious minorities subjected to blood-sport in Roman amphitheaters? Why did others volunteer to face the same fate? What legacies and lessons have ancient athletics left for the modern world?

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

TITLE: Communication, Culture, and Social Justice

DESCRIPTION
This course introduces students to several primary areas of focus for social justice-oriented scholarship and activism. These areas include racial justice, labor and economic justice, gender and sexual justice, and environmental justice. The course will also introduce students to ways that these issues are studied in the Department of Communication at UNC, by paying particular attention to popular culture and public engagement as sites of struggles for social justice.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only

TITLE: Researching Society and Culture
IDEAS IN ACTION GEN EDS: RESEARCH

DESCRIPTION
Qualitative research offers an exciting way to discover the world. There are so many unknowns about why people do the things they do, what is meaningful in people¿s lives, how conflicts arise or are resolved, how technologies shape possibilities, how symbols acquire meaning, and how social change occurs. Whereas we all have ready-made ¿frames¿ that provide us with hunches about why things are the way they are, the task of the researcher is to ask good questions and then seek answers, all the while being open to¿and eagerly pursuing¿surprises. This intellectual posture of genuine curiosity is what animates some of the best research. This is the kind of research you will learn about and will conduct yourself in this course.

COMM 120H.001 | Introduction to Interpersonal and Organizational Communication
TR, 12:30 pm - 1:45 pm. Instructor(s): Katie Striley. Enrollment = 22.
Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.

WRITING THE FULL LENGTH PLAY
Course Topic: Writing the Full Length Play

This course expands upon the students basic knowledge of character, plot, dialogue, and structure. The importance of editing and revision are explored in great detail. Students will write a full length, polished script and receive instruction on submitting work to theaters. The prerequisites for this course are COMM 131, DRAM 231, or ENG 130 or 132. Students who do not have these requirements can contact the instructor for approval to take the course.

Howard Craft is creator of the first dramatic African American Super Hero Podcast and The Jade City Chronicles which is currently in development with a release date set for the spring of 2017. Craft is also the creator of audio drama, The Jade City Pharaoh and is the Department of Communication Piller Visiting Professor of Practice.

GR1

The course is designed as an interactive examination and discussion of the techniques, processes and phenomena by which electronic news delivery in the United States began with early radio transmissions and developed into our current infinitely broad landscape of personal and professional storytelling.

Students will share in the process of reading books and articles, viewing and hearing tape artifacts, cataloguing and interpreting the dynamics of this evolution, all under the guiding stimulus of an instructor with forty five years of experience in high profile roles in network television sports, news and entertainment.

There will be reading assignments which translate into oral presentations, and two examinations in short essay form, a mid term and a final. But most critically there will be energetic and cooperative discussion and interchange in an atmosphere informed both by more than a hundred years of history and by the rapid ongoing day to day curve of media changes. A critical part of the curriculum will proceed from the reaction of students to what is happening in real time via the electronic devices they all hold in their hands and watch at home. Every class session will be partially aimed at placing today¿s events

Environmental Advocacy
This seminar introduces students to the foundations of environmental communication and environmental advocacy from both a theoretical and practical perspective. We¿ll learn about the history of environmental thinking and activism, explore the social construction of nature through discourse and the media, as well as gain an understanding of the role of environmental sciences in public discourse, law, and politics.

Detailed course description:
The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege

Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence.

We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance,

Class meetings may also be held in the following alternative locations: Swain Hall 106A and Swain Hall 200A.

Detailed course description:
This course is designed to provide a structured environment, instructor and peer feedback, along with production & postproduction resources in which to complete an advanced near-to-graduation media project. The project can be in narrative, documentary, experimental, or interactive, with a running time for videos of no longer than 20 minutes. The course assumes the student has already taken a fair number of the post-COMM 230 production courses offered in the department.
Seniors only.
This course has classification (class year) restrictions.
Permission of instructor for nonmajors.
A capstone course for seniors who are on the COMM Media Production track, and who have completed significant preparatory coursework. COMM 230 and at least one 500-600 level production course are required. Interested students must apply in the Fall with a project to be considered for enrollment. Students in the course will complete an advanced media project in narrative, documentary, experimental, multi-media or audio.

This course is for Seniors only.

GR3

This course focuses on the practice¿the doing of¿scholarly criticism. Although it is labeled a rhetoric course, it should be valuable for anyone doing critical research and scholarship. Critical research and writing compose an extraordinarily complex academic genre that brings together three or more modes of research and writing. At the very least, criticism incorporates theory, socio-politico-historical contexts, and critical ¿targets¿ (e.g., discourses, objects, practices, events). The arguments that compose criticism are typically "thick" with evidence as well as with theoretical and historiographical warrants. The ¿right¿ balance of those elements is partly a matter of critical norms that change over time, but it is even more heavily dependent upon the particular project and the questions posed by it. In the course, you will analyze the constructions of critical arguments, work through your own critical target by bringing it into

contact with various mid-range and larger-scale theoretical concepts, and bring a final critical project to fruition. The latter should be of a quality that would make at least a good conference submission,

COMM 841 001 12602 PERFORMANCE ETHNOGRAPHY Lecture 3 A
(In Person On Campus Learners)

Bldg: Communication Media **Room:** 0112 **Days:** Th **Time:** 15:30 - 18:20
INST 100 **Instructor:** ALEXANDER CRAFT,RENEE J

Class Enrl Cap: 14 **Class Enrl Tot:** 13 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR3

Course Objectives: This course is designed to immerse students in key theories, methods, and ethics of responsible ethnographic research from a performance-centered perspective. By engaging course materials and participating in individual field projects, participants will: -Learn what is ¿critical¿ and performative¿ about ethnography -Critically examine theories of ethnographic research as they are practiced in the field, in the archive, and on the page/stage -Analyze how the communities with which we work circulate within local and global networks of power as well as the types and degrees of power these communities assert on local and global forces; -Locate the researcher as a co-performer by examining her dialogic relationships within the community; -Experiment with performance-sensitive writing that translates embodied experiences into scholarly texts without losing their dynamism -Participate in an active community of ethnography field researchers Because critical ethnography concerns the rhetorical, ethical, and political effects of what we DO, performance is a fundamental dynamic in this seminar. We will explore performance as theory, method, event, and everyday occurrence. We will examine the relationship among performance, ethnography, economy, and culture. The Questions That Drive Our Inquiry Are: What is Critical and Performative about Ethnography? How is performance integral to ethnography? How do we lay the foundations for a field research project? How do we determine which methods to

GR3

Course Description: The specter of online disinformation and its relationship to populism, polarization, hyper-partisanship, and extremism has haunted international politics since 2016, when Trump won the US presidential election and the UK electorate voted to leave the European Union. In this class, we will undertake a critical, interdisciplinary, and historicized look at the strategic spread of false or misleading information, known as propaganda, mis/disinformation, or ¿fake news.¿ Rather than considering this to be an outgrowth of contemporary social technology, we will contextualize it historically within a long history of state and corporate use of disinformation to maintain the status quo. We will question many of the underlying assumptions of academic and popular discourse around disinformation, such as the role of the press in combating inaccurate information, the fantasy of a common episteme, the problem of ¿polarization,¿ and metaphor of disinformation as a pollutant. This class takes as its center a normative commitment to equality and justice, and focuses on how social differentiation, including race, gender, sexuality, and class, shapes the dynamics of disinformation.

Students will be asked to collect, examine, and analyze examples of disinformation on the topics of their choice, both current and historical. We will

Course topic: Buff and Polish

The objective of this seminar/practicum is to provide students with an orientation to the process of finding employment in an academic setting, and to provide students with opportunities to develop the materials necessary to assist in that effort. While the focus is primarily on entry-level academic positions, such as Assistant Professor, materials developed as part of the course are applicable to applying for post-doctoral fellowships, "ABD" positions, and work in other settings (eg. governmental) requiring a Ph.D.

COMP 283H.001 | Discrete Structures
TR, 2:00 pm - 3:15 pm. Instructor(s): Jack Snoeyink. Enrollment = 24.
Underlying the many applications of computers in our daily life are discrete structures like Boolean logics, relations, finite state machines, graphs, and networks that have mathematical specifications. You can tell your parents that the primary purpose of this class is to introduce these discrete structures and the formal proof techniques that support the production, verification, and maintenance of correct software. In fact, many of these are familiar from puzzles and games: already in 1990 Super Mario World expects kids to immediately understand a finite state machine diagram¿
This is a language class: you will learn vocabulary and idioms of a language that is more precise and less ambiguous than the languages that we usually speak or write. With any new language, you may at first struggle to make yourself understood, but by frequent immersion and fearless practice you can become comfortable thinking and expressing yourself creatively in the language. Students pick up languages at different rates, so work to teach each other. All can gain fluency with effort and a willingness to make mistakes. And fluency will help all your computer science endeavors ¿ precise and unambiguous

COMP 380H.001 | Introduction to Digital Culture
TR, 2:00 pm - 3:15 pm. Instructor(s): Tessa Joseph-Nicholas. Enrollment = 24.
This course examines the nature, function, and effects of the Internet and Internet use in the context of an extended study of its history, considering key technologies, concepts, ideas, innovators, and historical and sociocultural influences. Significant reading, writing, research, and beginner-friendly, code-light web development and data science components. No previous programming or technical experience is required. This course is suitable for both CS majors and nonmajors.

Tessa Joseph-Nicholas, MFA/PhD, is a Teaching Associate Professor in the Department of Computer Science. Her teaching and research explore the intersection of computing technologies and human culture with a blend of approaches and methods from the computational to the creative. Specific interests include Internet histories, cultures, and communities; digital literatures, arts, and poetics; inclusive, accessible web design and development; net neutrality and

Honors Carolina students can register themselves for SPRING 2023 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 18 during open enrollment.
COMP 562H.002 | Introduction to Machine Learning
TR, 12:30 pm - 1:45 pm. Instructor(s): Junier Oliva. Enrollment = 24.
Comp 562 Honors Section is an advanced undergraduate level introduction to machine learning. Prior experience with basic linear algebra, probability, statistics, and programming is expected. A tentative list of topics includes: Probability Distributions; Maximum Likelihood Estimation; Regression; Classification; Cross Validation; Generalization; Optimization; Neural Networks; Nonparametric Estimators; Clustering; Autoencoders.

PREREQUISITES: COMP 410, MATH 233, and STOR 435. Note: students enrolled should have prior experience with basic linear algebra, probability, statistics, and programming.

Dr. Junier Oliva is an assistant professor in the computer science department and principle investigator of the learning and understanding patterns with

Attributes: VP- Visual or Performing Arts, IDEA-Creative Expression, Practice, and Production, IDEA - FY - First Year Seminar
Reserve Capacity: 24-OCT-2021 UG FFYS Students **Reserve Enrl Cap:** 24 **Reserve Enrl Tot:** 0
18-NOV-2021 UG FFYS Students 0 0

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

In this Voice and Acting Class, the students will take a journey on getting to know, enjoy, and relish in their authentic voice. Through awareness and practice of the continuous breath, the student will development new habits of experiencing their breath, voice, body and how they live in this world. After the ground work has been laid, the students will integrate their voice into acting. The class will consist of work on poetry, contemporary acting scenes, Shakespeare monologues and Shakespeare scenes.

We will explore how theatre-makers can adapt to, interrogate and overcome the limitations caused by the COVID19 pandemic. We will explore theatrical performances from Galway, Belfast and North Carolina, hearing from professional artists who are making work in new ways, and thinking creatively about how theatre can recover and thrive in a post-pandemic world. We will also discuss relevant case studies from theatre history, showing how creative artists have responded in the past when faced with similar environmental and/or public health-related crises. And we will work together collaboratively to create new performances, using online tools to do so. One of the course's key features is its emphasis on international learning: we will seek to share our different experiences, to learn from each other, and to form exciting new links that will point ways forward for us, allowing us to think together about a post-pandemic theatre industry that is resilient, inclusive, and sustainable.

Please contact Adam Versényi at anversen@email.unc.edu for details.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

CMPL 280 : The Western and Science Fiction
This course will consider the unsuspected and often intimate relations between the Western and science fiction. We¿ll begin by delving into the mythic history of Westerns established by Hollywood cinema, taking stock of its well-hewn narratives, strange permuations, and then its devolution in later decades. While critics have frequently pronounced the death (or at least the demise) of the Western, this class will grapple with the ways in which its conceits¿above all, the idea of the frontier¿have been transferred to sci-fi (it's no accident that Disneyland¿s Western-themed Frontierland has been replaced by Star Wars Land). Along the way we¿ll talk about a variety of subject, including technology and enviroment, race and individualism, politics and vengeance. Readings will include film criticism/theory as well as selected texts on geography, the history of technology, and American culture. Visual materials for the class may include: The Searchers, Buffalo Boys, Close Encounters, Broken Arrow, The Harder they Fall, Looper, Westworld, Sanjuro, Johnny Guitar, Winchester 73, Alien, Nope, High Noon, Outland, Nomadland, Meek¿s Cut-Off, Mad Max: Fury Road, The Rover, Predator, and Prey.

CMPL 489H.001 | Empire and Diplomacy
TR, 2:00 pm - 3:15 pm. Instructor(s): Ted Leinbaugh. Enrollment = 10.
This course surveys foundational texts of Western literature and focuses on the theme of imperium. The course attempts to define the concept of imperium in epic literature (see, for example, Philip Hardie, Virgil's Aeneid: Cosmos and Imperium and David Quint, Epic and Empire) by exploring themes and topics broadly related to power and empire, including war and peace, imperialism, heroism, colonialism, irredentism, nationalism, and the negotiation of power through rhetoric and diplomacy. The course seeks to understand how ancient texts impact, shape, and define our world today.
Distinguished scholars will join us during the semester to help introduce and explain texts that may be unfamiliar, and internationally recognized diplomats and global leaders will share their thoughts on the play of power on the world stage today. No course prerequisites are needed to enroll.

CMPL 520: Grids, Media, and Power
In this class we¿ll consider the grid as a technology of space, perception, and thought. Indeed, the history of gridding ranges from accounting tables to urban design, from art history to advanced computing, and from older modes of political sovereignty to contemporary biopolitics. As such, the class will begin by surveying the invention and dissemination of grids in a variety of contexts and media before turning to its instrumentalization in art, architecture, city-planning, colonization, and (in the case of the United States) nation building. We¿ll draw on visual arts to analyzing with the operations of framing, partitioning, dividing to which life is increasingly subjected. Ultimately, the class will conclude by reckoning with the grid as an expression of the surveillance state. Readings for the class are likely to include texts by Rosalind Krauss, Michel Foucault, Jane Jacobs, Paul Virilio, and Hannah Higgins, among others. In addition to works of visual art (paintings, video-art, art installations, architecture), films for the class may include: Citizen Four, The Man Who Shot Libert Valance, The Bourne Identity, Stemple Pass, and The Matrix.

ENGL 057H.001 | Future Perfect
TR, 12:30 pm - 1:45 pm. Instructor(s): Matthew Taylor. Enrollment = 24.
What will our world look like in ten years? Fifty? One hundred? Will the future be a utopian paradise or a dystopian wasteland? Through a wide-ranging survey of popular science writing, novels, and films, this first year seminar will examine fictional and nonfictional attempts to imagine the future from the nineteenth century to the present. We will explore everything from futurology and transhumanism to warnings of imminent environmental collapse. Our focus will be less on assessing the accuracy of these predictions and more on determining what they tell us about the hopes and fears of the times in which they were made. The course will culminate in a short research paper on a future-oriented topic of your choosing.

FIRST YEAR STUDENTS ONLY.

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

ENGL 071H.001 | Healers and Patients
MWF, 11:15 am - 12:05 pm. Instructor(s): Kym Weed. Enrollment = 24.
When medical anthropologist Arthur Kleinman writes that ¿illness has meaning,¿ he reminds us that the human experience of being sick involves more than bodily symptoms. Moreover, the effects of illness and disability are rarely confined to one person. In this course, we will analyze a diverse collection of writers who have taken as their topic the human struggle to make sense of suffering and debility through a range of genres including fiction, non-fiction, graphic memoir, podcasts, and oral histories.
Divided into five units, the course will allow us to explore not just the medical, but also the personal, ethical, cultural, and political facets of illness from the perspectives of patients, healers, and families. Central texts will include /Ask Me About My Uterus/ by Abby Norman, /Black Man in a White Coat/ by Damon Tweedy, /Mom¿s Cancer/ by Brian Fies and /The Farewell/ directed by Lulu Wang. Additionally, students will explore a set of oral histories from the Stories to Save Lives project to learn more about the experiences of patients, healers, and families from across North Carolina.

TITLE: The Rhetoric of Wellness

IDEAS IN ACTION GEN EDS: FC-CREATE

DESCRIPTION
Scan any bookstore shelf and you¿d think the human psyche is hanging on by a thread. From fighting anxiety to seeking happiness to putting an end to procrastination, the titles compete for the opportunity to fix our problems with the promise of self-improvement. But are we really in worse psychological shape than those who have come before us? And how would we begin to study the status of our wellness? This proposed honors first-year seminar will offer one approach to exploring these and related questions: studying the rhetoric of self-help.

ENGL 089H.001 | The Machine Mistake from Frankenstein to the Smartphone
MWF, 10:10 am - 11:00 am. Instructor(s): David Ross. Enrollment = 24.
Science fiction supposedly pines for gleaming gadgetry. Even at its giddiest and wonkiest, however, science fiction remembers Frankenstein. It remembers that monsters develop ideas of their own; that they wind up haunting and even hunting us; that our innovations¿however seemingly benign¿threaten to escape our control and comprehension and embark on whole new careers of unintended consequence. Our course traces the genealogy of this machine anxiety. Our guiding questions will be: What are machines? Are machines ¿natural¿ or ¿unnatural¿? Are their dangers inherent? How do they change us? Is an artificially intelligent ¿machine¿ really a machine?

This unique section of English 105 will explore composition and rhetoric in video games. We will explore forms of technical writing, cultural criticism, and sociological analysis across different types of games and mediums. Along the way, the class will generate questions of gamification, gameplay, and user design while contemplating our own writing and research practices.

ENGL 132H.001 | Honors: Intro to Fiction Writing
TR, 3:30 pm - 4:45 pm. Instructor(s): Karen Tucker. Enrollment = 15.
A discussion-based course in which we'll examine the art and craft of fiction writing. Early assignments focus on craft elements of short stories, including

structure, time, characterization, dialogue, tension, and setting. Students are then asked to write two 8-12 page stories to be workshopped in class. Thorough revision of both stories takes the place of a final exam. The course is informal but rigorous, and active participation is expected. No textbook required; assigned stories and craft essays will be supplied. This course (or ENGL 130) serves as a prerequisite for other courses in the fiction sequence of the creative writing program (ENGL 206, 406, 693H).

ENGL 133H.001 | Honors: Intro to Poetry Writing
TR, 3:30 pm - 4:45 pm. Instructor(s): Ross White. Enrollment = 15.
In Honors: Intro to Poetry Writing is a careful study of a wide range of published poems and the basic terms and techniques of poetry. Throughout the course, students will compose, discuss, and revise original poems. Topics include image, metaphor, diction, syntax, and rhetoric, and students will explore how writing successful poems utilizes skills needed in many other areas of their lives and careers.

Ross White is the author of Charm Offensive, winner of the 2019 Sexton Prize, and three chapbooks: How We Came Upon the Colony, The Polite Society, and Valley of Want. His poems have appeared in American Poetry Review, New England Review, Ploughshares, Poetry Daily, Tin House, and The Southern Review,

During the summer of 2021, the hottest summer on record, Smithsonian Magazine published an article entitled ¿Can Climate Fiction Writers Reach People In Ways That Scientists Can¿t¿. This course ponders such questions and their connection to awareness, passions, and actions that might make a difference in addressing our current state of peril associated with rapid and devastating climate change. Climate Fiction, or Cli-Fi, is an emergent pop fiction genre that incorporates a variety of historically prominent pop fiction genres such as sci-fi, fantasy, and magic realism. Students in this course will analyze a variety of cli-fi fiction ranging from foundational eco-fiction meditations of the 1960s to current novels and films from the past 18 months. This winter session course aims to use literature as a catalyst for strategies that engender actionable attention to climate change as a phenomenon that threatens our existence in nearly incomprehensible ways. We will read novels, critical essays, journalism, and poems as well as watch some films.

21st Century Essay

Creative Nonfiction as a genre has exploded over the past decade because a variety of writers took risks with form, style, content, intent, and found new ways to communicate about modern life that differs greatly from fiction and poetry. The 21st Century Essay is unrestrained, mysterious, and explosive. Writers have challenged the traditional modes of nonfiction by working against the limitations of argumentative or strictly analytical structure with an eye toward our modern, discursive, fragmented, and elusive globalized world. Writers of the genre are of the most diverse and intersectional backgrounds in publishing. With a fearlessness that is revolutionary, they wrestle with culture, the self and memory, doubt, myth, history, technology, sex and identity. In this class we will read widely within essay as a genre¿a genre that is ingenious, strange, playful, timeless, and performed¿as well as write and consider our own work every week. The course will culminate in 2 large group workshops of long-form essays.

ENGL 234H.001 | The British Novel from 1870 to World War II
TR, 12:30 pm - 1:45 pm. Instructor(s): Pamela Cooper. Enrollment = 24.
The course studies the English novel at an important transitional stage in its development -- from the late nineteenth through the early twentieth centuries ¿ through detailed consideration of some representative texts. These cover late Victorian fiction (Hardy, James, Kipling); the fin de siècle (Wells); early modernism (Conrad, Forster); and the experimental novels of the high modernist period (Woolf), which in some ways prefigure postmodernism and the fiction of our own time. Comparing these texts in thoughtful and stimulating ways, emphasizing historical, political, and cultural contexts as much as content and form, we will explore the intellectual and literary concerns of the English novel during a period of great social, technological, and political upheaval: the passing of the Victorian age and the emergent years of the twentieth century.

Program: Honors Semester in London
Title: Life Writing
Dates: January 22 - April 30, 2022

There is currently a boom in non-fiction writing, as the lines between `real events¿ and the imagination are
increasingly being questioned. The best writers are embracing and experimenting with the `essay¿ form, where fictional techniques such as narrative, pacing, and dramatization combine with traditional non-fiction subjects such as memoir, philosophy, and journalistic reportage. In this course, you will study the works of a diverse range of writers, analysing the craft of non-fiction through careful close readings. The class will include regular professor-led workshops, in which you will present your own experiments with the technical elements from the reading seminars. Guest speakers will come from the UK¿s strongest non-fiction voices, and we will use London sites as inspiration for your work. Learn how to combine the personal with the political in your

Longer Stories

Interested in exploring fiction beyond the short story? In this writing-intensive class for all skill levels, we¿ll produce works longer than forty pages. Maybe what you write will turn into a novel. Maybe a novella. Maybe you'll simply feel the satisfaction of carrying your characters through a sustained journey. We will workshop each other's stories, read published works, address structural concerns, encourage our classmates to keep going, and chat with guest speakers from various genres.

ENGL 337H.001 | The Romantic Revolution in the Arts
T, 2:00 pm - 5:00 pm. Instructor(s): Joseph Viscomi. Enrollment = 20.
This interdisciplinary course examines the technical and aesthetic revolutions in the fine arts of the English Romantic Period. It will discuss productions, experiments, and aesthetic theories of William Wordsworth, S. T. Coleridge, J. M. W. Turner, and William Blake, focusing on the developments of lyrical poetry, landscape painting, and original printmaking. We will pay special attention to the period's new ideas about nature, the sublime, picturesque travel, genius, originality, and social role of the artist. There will be a studio workshop in drawing landscapes in pen and ink according to 18th-century techniques and formulae and a workshop in printing facsimile plates from Blake¿s Songs of Innocence and of Experience. Knowledge of printmaking and painting is not required.

Program: Honors Semester in London

Title: Studies in the Modern British Novel
Dates: January 22 - April 30, 2022

We will read representative novels by British writers of the twentieth and twenty-first centuries, tracing the evolution of the form in the era of the waning of the British Empire and the emergence of post-imperial England. We¿ll investigate the enormous shifts in national identity which the slow decentralizing of England on the global stage has necessitated, and consider the country¿s cultural and political changes from just after World War I to the era of Brexit. The course begins with novels by Virginia Woolf and Joseph Conrad ¿ which focus upon London as a dominant hub and describe the contours of British modernity in the early twentieth century. We¿ll move on to novels by Angela Carter, Kazuo Ishiguro, and Ian McEwan, all of which reveal the highly complex, cosmopolitan society which the loosening of imperial bonds has brought about in the late twentieth and twenty-first centuries. We¿ll conclude with

ECON 058H.001 | Researching the Tools for Success in College
TR, 11:00 am - 12:15 pm. Instructor(s): Jane Cooley Fruehwirth. Enrollment = 24.
In this Course-based Undergraduate Research Experience (CURE), we will study the barriers and tools for success in college. Students will identify a research question of interest and work in groups to address it, creating their own evidence on the topic through surveys and descriptive statistics. Students will synthesize existing evidence in the literature and brainstorm potential solutions with classmates. Students will learn the following skills:
1) Data-story telling to effect policy change,
2) The danger of mistaking correlation for causation,
3) The rewards and challenges of doing research,
4) How to synthesize findings in the primary literature without becoming overwhelmed,
5) The power of economics to inform a range of questions.

ECON 325H.001 | Entrepreneurship: Principles and Practice
TR, 2:00 pm - 3:15 pm. Instructor(s): Chris Mumford. Enrollment = 24.
The course is designed to help students turn an idea into an enterprise. We will execute a design sprint to reinforce the understanding of the ideation and validation process. Students develop high resolution ideation and marketing skills. We delve into classic strategy principles by applying them given new market and technology trends. Finally, we develop a street smart version of finance through cash flow forecasting and core fund raising techniques. By the end of class, students will be able to discover ideate, validate and accelerate ventures.
Grading will largely be determined by student effort. The class is taught mostly in a flipped classroom, group experiential learning environment. Class

participation and being a solid group contributor are essential for grading success. The class will use tutorials, examples and templates extensively. Low stakes quizzes will be used as a recall tool. The primary communication tool is Slack.

Health Economics: Markets and Supply-Side Actors

This course explores the economics of health care markets with a focus on supply-side actors, such as insurers, hospitals and physicians, and drug manufacturers. We will present an assortment of topics in health economics and analyze them using tools from applied microeconomics and industrial organization. The course is taught by Dr. Qing Gong (qinggong@email.unc.edu)

TITLE: How Green are We? Examining Sustainability at UNC
IDEAS IN ACTION GEN EDS: FC-VALUES

DESCRIPTION
How sustainable is our university? Cities around the world face issues of environmental degradation, congested traffic, poor water supplies, sanitation concerns, poor energy delivery and waste management. A research university is analogous to a small city, where we can both investigate and more easily implement sustainable technologies and practices. In this class we will examine the sustainability concerns of the modern university, going "back of the house" around UNC. how green is our energy? Our food? Our water? How do we handle waste across these inputs? We will examine how sustainability is measured and improved, comparing our institution¿s progress to other similar schools, and ask ourselves both where we can do better and how we can convince the system to make it happen.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only

enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

ENEC 325H.001 | Water Resource Management and Human Rights
MWF, 11:15 am - 12:05 pm. Instructor(s): Amy Cooke. Enrollment = 24.
Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured, even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth¿s population?

This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water

Attributes: IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

TITLE: Freshwaters in the Anthropocene
IDEAS IN ACTION GEN EDS: FC-NATSCI

DESCRIPTION
Freshwaters sustain myriad ecosystem services by providing drinking water, irrigation, inland fisheries, transportation, recreational opportunities, nutrient cycling, and biodiversity. At the same time, both water quality and quantity are impacted by land use, water abstraction, damming, contamination, and climate change. This seminar will focus (1) on understanding how these anthropogenic pressures affect freshwater ecosystems differently across ecoregions, and (2) how management, legislative, and social initiatives have adapted or developed solutions. We will focus mainly on the United States but consider case studies from around the world. Students should be prepared to read and discuss three materials per week. These reading materials will include a range of popular media including podcasts, newspaper articles, and book chapters, as well as scientific articles and overviews. We will also spend some

Attributes: BN- Beyond the North Atlantic, GL- Global Issues, IDEA - Global Understanding and Engagement, IDEA - FY - First Year Launch (Class Section)

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

GLBL 483H.001 | Comparative Health Systems
MW, 11:15 am - 12:45 pm. Instructor(s): Erica Johnson. Enrollment = 24.
National healthcare systems evolve in the context of specific political, economic, and cultural histories and, as a result, the ways countries finance, organize, and deliver care vary greatly. Yet the healthcare challenges that many countries face are remarkably similar. This course provides students with an understanding of the origins and comparative performance of a range of international healthcare systems. The course will cover the recurring debates among health policy experts concerned with health sector reforms in low, middle, and high income countries. In addition, the course will examine some of the history of the field of global health and will highlight the competing global and local influences at play in specific health systems. The course will explore public and private cooperation in health care provision and the role of international institutions in shaping health systems. Comparing models of health care delivery will improve students¿ understanding of health outcomes around the world and at home. By the end of the course, students will have the knowledge and tools to critically analyze the origins, designs and outcomes of health system reforms. The course will incorporate knowledge and views from

GLBL 486H.001 | Sports and Globalization

TR, 9:30 am - 10: 45 am. Instructor(s): Jonathan Weiler. Enrollment = 24.
This course explores some of the many interesting relationships between sports and globalization.
The course will proceed thematically - exploring race, poverty, gender, nationalism and other issues related to tensions around globalization - and also topically, focusing on major events like the Olympics, World Cup and the spread of particular sports, notably soccer and baseball.
In examining these themes and topics, we will be delving into sports as both important social and cultural practices in and of themselves and also keeping in mind the larger social, cultural and political forces shaping studies of globalization as those relate to sports. At all times, we'll be scrutinizing carefully the construction of the arguments presented in the readings, the evidence used, and the underlying premises - racial, gendered and otherwise - that might be informing and influencing the author's perspective.

Destruction and Reconstruction of Cities in an Age of Crisis

Instructor: Dr. Elena Trubina (Professor, Ural Federal University)

Course Description: This course will lay out conceptual and political perspectives on the global interrelations, historical as well as theoretical, between cities, climate change, warfare, and cultural and urban heritages. The canonic map of cities affected by belligerent or natural destruction (Berlin, Lisbon, London, Hiroshima, San Francisco, Dresden, Warsaw, Stalingrad, Tokyo) continues to be centered, historically and conceptually, around cities of the Global North. Yet urban destruction in the twentieth and twenty-first centuries has proven most devastating in Eastern Europe. The course will include the case of the recent bombing of well planned and thriving Ukrainian cities (Bucha and Mariupol, especially). Destruction of these and other cities will be examined in

The Theory and Practice of Conflict Transformation

This course focuses on several mechanisms and strategies for managing and transforming conflict on international, community, and interpersonal levels. The pedagogy of this course will be both theoretical and practical. The course will be held both in person and online.

This is a required course for Rotary Peace Fellows, and other students are also welcome! To enroll, please e-mail Zach Ward at wzw59@email.unc.edu. Must be taken for 3 credit hours.

18-NOV-2021 UG FFYS Students 0 0

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT HELP
Check the FAQ webpage for answers to frequently asked registration questions: https://ideasinaction.unc.edu/about/faq/ (see Registration and Credit section)

Contact the First-Year Curriculum Specialist, Ben Haven (bhaven@email.unc.edu) if...

WHO CAN ENROLL IN THIS CLASS?
Only first-year students (and transfer students who transferred <24 post-high school college course credits) can enroll in this class. Students may only enroll in one (1) First-Year Seminar or one (1) First-Year Launch during their time at UNC. If you are a transfer student, please refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students should not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

HIST 063H.001 | Water, Conflict, and Connection: the Middle East and Ottoman Lands
MW, 3:35 pm - 5:00 pm. Instructor(s): Sarah Shields. Enrollment = 24.
Despite its centrality for the lives and the livelihoods of people in the Middle East, water has seldom been examined in its own right as a contributing factor to its history. This - First Year Seminar will explore the many ways in which water has shaped the history of the region, and the effects it currently has on life in the Middle East.
Along the Mediterranean and Aegean coasts as well as the Red Sea and Arab/Persian Gulf, seafaring and fishing played important roles in the economy; in the Gulf, pearl-diving became an important local industry as well. Agricultural innovations allowed permanent settlement in areas with little rainfall. Rivers and seas were essential for transportation, connecting populations of far-flung parts of the Middle East with each other, facilitating commerce and pilgrimage. The availability of clean water has become an increasing problem as industrialization, consumerism, and climate change compromise water availability, soil beaches and sully the region's drinking supplies. Water and conflict have been indivisible in the region, since water is both a crucial

HIST 163H.001 | Modern Central Asia
TR, 3:30 pm - 4:45 pm. Instructor(s): Eren Tasar. Enrollment = 24.
This course analyzes the history of the republics of Soviet Central Asia (the five "stans") from the Mongol Empire to the present, with a focus on the past two hundred years. Significant themes include religion, the state, gender, colonialism, and communism. Course assignments include several works of historical fiction. Discussion is an important part of the course requirements.

Dr. Tasar studies Central Asia, Institutions, Islam, Religion and Politics, Social History, and the Soviet Union.

HIST 256H.001 | France, 1940 to the Present
TR, 12:30 pm - 1:45 pm. Instructor(s): Donald Reid. Enrollment = 24.
In this class, we will examine in depth five sets of events that have made contemporary France: (1) collaboration and resistance during World War II; (2) decolonization and the war in Algeria; (3) the political, cultural and social movements born of the ¿thirty glorious¿ years of postwar economic expansion which marked all facets of French life in the late 1960s and 1970s; (4) the transformation of France through immigration and membership in the European Union; and (5) the long-term effects of the 2008 recession, including the election and re-election of Emmanuel Macron, the appeal of the populist right, and the mobilization of the ¿yellow jackets.¿ In this class, we will probe these developments, interconnections among them, and the changing ways they are remembered and given meaning in France. The instructor will give short lectures, but the heart of the class will be students¿ analysis in discussion and short writing assignments of a diversity of films, memoirs and novels.

HIST 260H.001 | From Kings to Communists: East-Central Europe in the Modern Era
MWF, 11:15 am - 12:05 pm . Instructor(s): Chad Bryant. Enrollment = 24.
This honors course follows the history of East-Central Europe (today¿s Ukraine, Poland, Czech Republic, Slovakia, and Hungary) from the eighteenth century to the present. Nationalism will be a dominant theme in the course. The first third of the course studies the rise of nationalism within the Habsburg monarchy, which, before its demise after World War I, stretched from present-day Poland to Bosnia and included twelve major nationalities. The second third examines the years from 1918 to 1945. The era began with the creation of ¿multinational nation-states.¿ It culminated with Soviet ¿liberation¿ from Nazi domination and the creation of nationally homogenous populations in East-Central Europe. The last third concentrates on the period of Communist rule in the region, which lasted until 1989, and will conclude with Russia¿s war in Ukraine.

Chad Bryant studies the social and cultural history of Central and Eastern Europe from the eighteenth century to the present. His most recent book, Prague:

HIST 315H.001 | Nation-Building in Latin America
MW, 3:35 pm - 4:50 pm. Instructor(s): Cyntha Radding. Enrollment = 24.
History 315H, ¿Nation-Building in Latin America,¿ focuses on Mexico and several countries of the Caribbean and South America, with comparative references to the U.S. in order to explore the major debates that have arisen in the past and in our own time over citizenship and the nation-state in the multi-ethnic and culturally complex societies of the Americas. It explores history and memory around the issues of human rights, gender, enslavement and emancipation; Indigenous peoples; religion and secular society, territory, and the nation-state. Class time will combine short lectures with discussions that weave together past and present, including Indigenous protests of the twentieth century, relating to the tumultuous social movements that we witness today. The fraught presidential elections of recent times in the U.S., renewed awareness of social and economic inequalities, and the deep roots of violence in the republics of both North and South America make the question of nation-making especially urgent. Readings and class discussions will center on primary sources in different media, including historical texts, literature, art, film, and music.

HIST 340H.001 | Fair Trade? Ethics and Business in Africa
TR, 9:30 am - 10:45 am. Instructor(s): Lauren Jarvis. Enrollment = 24.
Explores sub-Saharan Africa both as a historical site of exploitative, extractive labor practices and initiatives to make business more ethical. Starting in the precolonial period, it considers topics such as ending the slave trades, the foundations of colonial economies, development projects post-independence, and the use of conflict minerals.

Lauren Jarvis is an Assistant Professor of History. She grew up in NC and earned her BA in History at that school down the road that shall not be named (rhymes with "fluke"). She then received her PhD in History at Stanford. Jarvis' research focuses on the history of religion in 20th-century South Africa. As evidenced by courses like this one, however, her teaching interests are wide and often reflect a commitment to using history to better understand pressing issues in the present.

HIST 534H.001 | Slavery and the US Civil War

MWF, 2:30 pm - 3:20 pm. Instructor(s): Antwain Hunter. Enrollment = 24.
The United States¿ historic relationship with slavery, particularly during the Civil War Era, is often misunderstood in the present day This loosely chronological course explores the country¿s ties to the institution during this important period in the American past. Course content features the institution¿s expansion into the United States¿ western territories, the political debates around slavery in the decades preceding the Civil War, the rise of the abolition movement and the proslavery response, slavery¿s role in the secession crisis, the wartime experiences of enslaved people on the Southern home front, the Lincoln administration¿s policies towards enslavers in the Confederacy and the slaveholding Union states, wartime emancipation and formerly enslaved peoples¿ military service, the struggle to pass the XIII Amendment, and freedpeople¿s fight to fully realize their freedom during Reconstruction. Students in this course will read a number of important secondary texts on the subject but will also engage with a wide array of sources produced during the Civil War Era, which will allow them to draw their own conclusions about this complex period. These primary sources will include slave narratives, period

HIST 890 - Readings in Global Christianity

This course explores how the study of Christianity intersects with topics central to global history, including issues of scale, translation, borders, and mobility. Over the semester, we will consider: How has Christianity linked people and places around the world? How did histories of Christianity help produce a global turn? And how have global approaches to history changed the study of Christianity? In addition to texts chosen by the instructor, readings will reflect the geographic and thematic interests of the students enrolled in the course. Assignments will include papers, presentations, and the development of teaching materials.
